Rental 6,5 ⊕

Generating sets

These generating sets have reinforced chassis and standard equipment which focus on guaranteeing the safety of the user and the machine. They have been designed to meet the specific requirements of the rental market in terms of manoeuvrability, safety and stability. Every generating set in this range has the "rental pack": differential protection, trolley kit, airlift (transverse handling bar).

* Rental version ⊕

** In the Rental ⊕ version, the dimensions are 81x56x59 cm

(1) in the Rental ⊕ version, this generating set is equipped with the AVR (Automatic Voltage regulation) function

Welding kit

Welding gensets

The welding generating sets combine the technology developed for the PORTABLE Rental Power range with the capacity to provide electrical energy and a welding function.
